

NEXUS WEBNETS™

Exceptional strength to withstand heavy loads and secure substantial objects.

Nexus WebNets from InCord provide a custom, high-tension netting system, applicable wherever minimal deflection is required. Cargo netting, rack guards, conveyor guards, construction debris and other heavy containment are just a few of the applications for this intricate and exceptionally stable netting system.

By utilizing 1" polyester, 2" polypropylene or 2" nylon web straps and a precision tack at each web intersection, Nexus WebNets form a versatile, yet static barrier to protect or secure objects of extreme weight, mass, or potential velocity. Equally ideal for large and small scale needs, Nexus WebNets can create a removable shield of immobility for ship decks, flatbed trailers and a wide variety of large equipment applications including military.

- Custom mesh sizes including fractional increments
- UV and water resistant
- State of the art fabrication for high quality and low lead times
- Numerous hardware options to suit your application

Nexus Fusion™ no-stitch WebNet

InCord also offers an innovative web net constructed of 1" polyester webbing, featuring fiber-interwoven and fused intersections. This technology is exclusive to InCord and creates a flat and solid web connection without the need for additional tack.

Nexus Fusion is an optimal solution when critical lead time, as well as reduced overall net weight are required. Available in 8" On Center (OC) mesh size.

Slotted webbing

InCord can also provide 1-3/4" nylon web nets in a slotted web configuration in 4" OC and 8" OC mesh sizes, eliminating the need for tack at each intersection and reducing both lead time and expense.

Hardware options for any application

A diverse array of net terminations, including web loops, grommets, snap hooks, steel rings, cam buckles and more, are available to complete your custom Nexus WebNets and ensure the right fit and fastening system for your unique application.

These are some of our most popular attachment options:

D-Ring
1-1/4 inch
Nickel Plated Steel

Swivel Snap Hook
3-1/4 inch (1-1/16 inch ID)
Stainless Steel

Wire Lever Snap Hook
3/8 inch x 4 inch
Stainless Steel

Double J Hook
2 inch
Vinyl Coated Steel

Cam Buckle
1 inch, 2 inch
Galvanized Steel

Snap Hook
120mm, 80mm
Zinc Plated Steel

Grommet
7/16 inch ID
Stainless Steel

Ring
2-1/2 inch, 3 inch
Zinc Plated Steel

1-3/4 inch
Slotted Webbing

Custom solutions for unique requirements

InCord is a fully integrated internal design facility that can meet your specifications and load requirements within a very competitive lead time. Our engineering team will work with you to best determine optimal construction and cost effectiveness.

Specific load ratings of any custom Nexus WebNet can be determined as needed on a consultation basis.
